

August 2016

NET Cancer Day 2016 - “Let’s Talk About NETs Campaign”

Thank you for your interest in the World NET Cancer day on Thursday 10 November 2016 and the “Let’s Talk About NETs Campaign”.

World NET Cancer Day is an annual, awareness-raising event coordinated by the International Neuroendocrine Cancer Alliance (INCA) at an international level, and comprised of representatives from our Partner organizations all over the world.

Neuroendocrine cancer (NETs) is the umbrella term for a group of unusual, often slow growing cancers, which develop from cells in the diffuse endocrine systems. They are found most commonly in the lung or gastrointestinal system, but they can arise in other parts of the body, such as the pancreas, ovary and testes, among other sites. NET cancers are on the rise and can affect both men and women at various stages of their life, from 17 – 90 years old.

The aim of World NET Cancer Day is to:

- Raise awareness of NET cancers among decision makers, health professionals and the general public. Accurate information is key to improving quality of life and prognosis for NET cancer patients and can decrease misdiagnosis.
- Focus on NET cancers for a day to bring hope and information to people living with NET cancers, their caregivers and families.
- Ensure equity in access to care and treatment for NET cancer patients around the world.
- Encourage more funds for research, treatments, patient support and resources for NET cancers.

To make this day successful, we are seeking support from all over the world. We are asking people, cafeterias, cafes and others, to use our World Net Cancer Day (Let’s Talk About NETs) branded coffee cups for the day. We will provide (at no charge) you with our branded coffee cups, lids and promotional material.

Contact the NET Cancer organization in your country for more information and how to order cups and promotion material.

We thank you for your interest in raising much needed awareness for NET Cancer on World NET Cancer Day, and helping us seek a cure for NET Cancer.

For enquires and information regarding World NET Cancer and the “Let’s Talk About NETs Campaign”. and our please contact our member organization in your country:
